

## CRIS Proxy Questionnaire

<b>CRIS/P EXTENT OF PARTICIPATION SCALE 1</b>											
<p><i>Let's begin. For these questions, please answer in the way that best describes your Veteran from YOUR perspective, even if your answer differ from what your Veteran might say. These first questions are about how often YOU think your Veteran did or experienced certain things in the past two weeks. For this set of questions, please use this scale. On the left side is "More than once per day," meaning your Veteran did the activity more than once in a day. On the right side is "Never," meaning your Veteran never did the activity. There is a range of answers in between. (Review all) If you don't know the answer to the question, or if you prefer not to answer, let me know. If the question is not applicable to your Veteran – for example, if I ask a question about school and your Veteran isn't currently a student - you can say "Not applicable". When you respond to these questions, focus on your Veteran's activities <u>in the past two weeks</u>. If the past two weeks were really different from each other, try to give the average of how often your Veteran did the activity over the past two weeks. There are no right or wrong answers to these questions, so there is nothing that you can say that will be wrong.</i></p>
